Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

- D1: WO 02/12522 A (THE UNIVERSITY OF SURREY; ROBERTS, LISA, ORIEL; BELSHAM, GRAHAM, JOHN) 14 February 2002 (2002-02-14)
- D2: TOTH R L ET AL: "A novel strategy for the expression of foreign genes from plant virus vectors" FEBS LETTERS, ELSEVIER SCIENCE PUBLISHERS, AMSTERDAM, NL, vol. 489, no. 2-3, 2 February 2001 (2001-02-02), pages 215-219, XP004248888 ISSN: 0014-5793
- D3: WO 02/29068 A (ICON GENETICS AG; GLEBA, YURI; DOROKOV, YURII; IVANOV, PETER; ATABEKOV) 11 April 2002 (2002-04-11)

D1, which is considered to represent the most relevant state of the art, discloses a method of conferring disease resistance to a transgenic plant using a construct comprising an internal ribosome entry site (IRES).

D2 discloses a method for expressing heterologous genes in transgenic plant using an IRES or its complementary sequence.

D3 discloses methods for expressing heterologous genes -in either sense or antisense orientation- in transgenic plants using an IRES.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT). The same holds true for claims 2-235.

The problem to be solved by the present invention may be regarded as the provision of an alternative method for conferring disease resistance to a transgenic plant.

The solution is the provision of a method in using a sequence complementary to a coding sequence for a heterologous resistance gene in combination with a sequence complementary to an IRES.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/US2004/021451

The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

None of the cited prior art documents discloses nor suggests the use of a sequence complementary to a coding sequence for a heterologous resistance gene in combination with a sequence complementary to an IRES.

The same applies mutatis mutandis to the independent claims 30, 73, 119, 135, 137, 141, 142, 152, 154, 158, 159, 169, 175, 176, 196, 216. The dependent claims as such also meet the requirements of the PCT with respect to novelty and inventive step.
